

Features, Advantages & Benefits

DR Mini View

The system has been developed for the non tech savvy Veterinarian without time to read manuals. The operation is very simple, and easy to learn the training is very quick also. This handheld system has been on the market for over two years with hundreds sold in the European market. The manufacturer has developed a direct link with end-user who provide the ongoing feedback. The President of the company personally follows up on all orders providing the best quality control possible. In the past two years they have never changed a control display unit. They are a ISO 2000 and CE certified Manufacturer (UL in US) they are required to have to report all relevant product issues and have never had any recalls or factor repair notices. There have not been any technical or operational issues with the, it's great!.

The DR Mini View warranty provides coverage against manufacturing defects on the system for and the CCD sensor for 2 years (except battery). Is it produced by a world leader company with very little problems. The outer shell of the sensor is very durable, but if damaged from a strong bite it's not covered by warranty. The Life expectancy information provided by the control display unit and the sensor manufacturer states "100,000+ shot life cycle".

With our lab test we measured a real resolution of 12-14 lp/mm; the sensor manufacturer states 20 lp/mm (size 1 and 2). The minimum resolution requested from IEC rules and certification is 6,3 lp/mm.

The system is ideal for any veterinary office interested in starting or expanding the dental portion of their practice, it's the most versatile, cost effective, simple easy to use system ever made and it's the best way of providing dental radiology to you patients.
